

Prefabricated MSABP plant Pex Industries has a history of providing various large water treatment plants to the Pacific region and around the world, using various technologies for custom built projects.

In an exclusive joint venture with Aquarius, for the Australasian and Central Pacific region we provide innovative solutions for municipal and industrial wastewater treatment.

We design, manufacture, install and where required maintain the MSABP no waste sludge, activated biological treatment system - ELCAT for toxic and non-biodegradable waste streams and supply diffused aeration technology.

**Sewerage and Effluent Treatment**

**Total Turnkey Projects**

**Maintenance and Operation**

**Coarse and Fine Aeration Technology**

**ELCAT (Electrochemical and Catalytic wastewater treatment)**

**MSABP™ (Multi-Stage Activated Biological Process )**

- ✓ ODOURLESS
- ✓ COLOURLESS

√ **SLUDGE FREE**
